

Media Creation resources and examples

CNET – <http://www.cnet.com/hardware>

Reviews and lowest-price finding tools for digital cameras, printers and image-editing software.

CompuMentor – <http://www.compumentor.org>

Inexpensive software for non-profits, including Microsoft Publisher, a desktop publishing program.

DTPHelp – <http://dtphelp.com/index.html>

Desktop publishing help and information.

Media Alliance – <http://www.media-alliance.org/computer.html>

Media and materials creation training and resources for media workers, activists, and community organizations.

Digital storytelling resources and examples

Community Media Center – <http://www.grcmc.org/lowwatt.shtml>

Has information on low-power community radio.

High Plains News Service – <http://www.worc.org/hpns/index.html>

Is a radio service that covers Western issues from a community perspective.

The Independent Media Center - <http://www.indymedia.org/>

Great examples of using technology to help tell stories.

WTO Watch (IATP) – <http://www.wtowatch.org>

See stories from the WTO protests in Seattle, DC and around the world told with web and digital recording technologies.

The Center for Digital Storytelling – <http://www.storycenter.org>

The Center for Digital Storytelling assists people in using digital media to tell meaningful stories from their lives and their communities. Their "Storytelling Cookbook" is especially useful.

Southern Rural Development Initiative – <http://www.srdi.org/info-url1806/info-url.htm>

SRDI's "Parables to Policy" is an excellent example of using audio, video, pictures and web technologies to tell a story about issues affecting people and communities.

Video Machete – <http://www.pbs.org/merrow/trt/sites/machete.html>

Video Machete empowers youth to tell their own stories using digital video cameras and other new media technologies.
